

D E S I G N E R - S T Y L E

K E Y P A D S

Designer-Style Keypads provide the ability to control and monitor lighting, audio, video, and other home systems, both in a single room and throughout your home. Each Keypad button may be programmed to control an individual lighting zone, any group of lighting zones, or a lighting scene for your entire home and landscape.

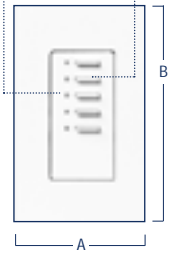

By taking the place of several switches, Keypads minimize wall space, while maximizing the number of functions possible. Keypads are often used in high-traffic areas, where convenient control of many lights is needed, but the design elegance of a single Keypad is desired. The design of this Keypad features five slim buttons in an industry-standard opening size, allowing multiple Designer-Style Keypads to be ganged together, and also to be ganged easily with other devices in your home, such as volume and security controls.

Designer-Style Keypad models are available with options including a Master Raise/Lower toggle or an Infrared Receiver. Designer-Style Keypads can be custom-engraved, below each button, with names of your choosing at no additional cost.

DESIGN NOTES:

DESIGNER - STYLE KEYPADS

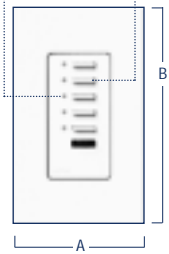

HWI-5S-NM

A = 2.75" (70mm)
B = 4.50" (114mm)

HWI-5S-M

A = 2.75" (70mm)
B = 4.50" (114mm)

HWI-5S-IR

A = 2.75" (70mm)
B = 4.50" (114mm)

FEATURES

- Each button on a Keypad may be programmed to perform any one of many different functions, including
 - turning individual scenes/zones on or off
 - turning selected scenes/zones on or off as a group
 - raising or lowering selected scenes/zones as a group
- Small LEDs beside each button show the status of the scene or lighting zone programmed to that button
- Multiple Designer-Style Keypads can be ganged together to create 10- or 15-button Keypads
- Options include: a Master Raise/Lower toggle or an Infrared Receiver

NOTE: Lutron recommends that Keypads be mounted close to eye level (between 52" and 60" high)
