

RadioTouch® 3-gang wall control and table top transmitter for control of electric lighting, Sivoia® QED controllable window treatments and AC motorized projection screens. Claro® 3-gang wallplate and tabletop transmitter shown with custom engraving.

RadioTouch® is a simple wireless RF system that gives every presenter control of lights, motorized window shades and projection screens. Transform single function rooms into flexible, multi-use spaces for simple and efficient command of the lighting environment.

With RadioTouch®, a presenter or speaker can:

- highlight the front of a room to focus attention
- raise light levels for clear viewing of paperwork
- dim the lights and lower a projection screen to view slides or video
- raise motorized window shades to let in natural light

ideal for conference rooms, classrooms, training rooms and more

RadioTouch® excels in any multi-functional space that is used by different people for different purposes throughout the day.

flexibility

The proven wireless RF technology of RadioTouch® offers the flexibility to have control from tabletop, podium, desktop or room entrance wallbox locations. It can be used in new construction or as an easy retrofit in an existing installation.
