

Lutron® lighting control add-on package

Wireless shade and lighting control

Wireless shade control

Sivoia® QS Wireless shading solutions enhance your home by providing convenient control of shades from anywhere in a space.

Wireless lighting control

Add Lutron wireless lighting controls to a room for total control of light. Like Lutron wireless shading solutions, Lutron wireless lighting controls add to the usability and comfort of a space by letting you adjust light levels for a specific task from anywhere in the room. Save energy by dimming lights, and simultaneously open the shades to take advantage of available daylight.

Lutron lighting controls can be used in a single room or throughout an entire home. Wireless control of lights and shades gives you complete control of all the light in a space and the ultimate in convenience.

Dual Pico™ control shown controls shades and lights

Lutron® wireless | lighting control add-on package

Add any or all of these lighting controls to a room to conveniently adjust lights from the couch, the nightstand – and every space between.

Pico™ wireless lighting control

Similar to a Pico shade control, this versatile wireless keypad can control compatible wall or lamp dimmers. Adjust lights from anywhere in the room.

Wireless wall dimmer

Adjust lights and recall a favorite light level from a wall-mounted digital dimmer.

Wireless wall switch

On/off light control for applications where dimming is not desired.

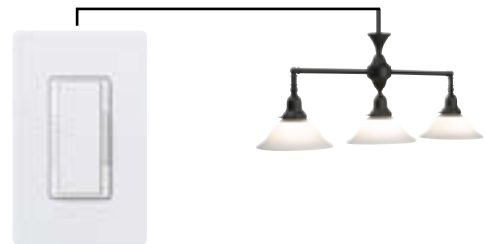

Wireless lamp dimmer

Digital dimmer that plugs into a lamp and wall outlet for wireless dimming control of table or floor lamps.

Wireless control options

Pico wireless lighting control can communicate with compatible Lutron wireless lighting controls.

Order any of these innovative wireless lighting controls through the Shade Configuration Tool (SCT).
