

HomeWorks® | wireless series

example systems

total home lighting control system featuring
wireless radio frequency (RF) technology
for new and existing homes

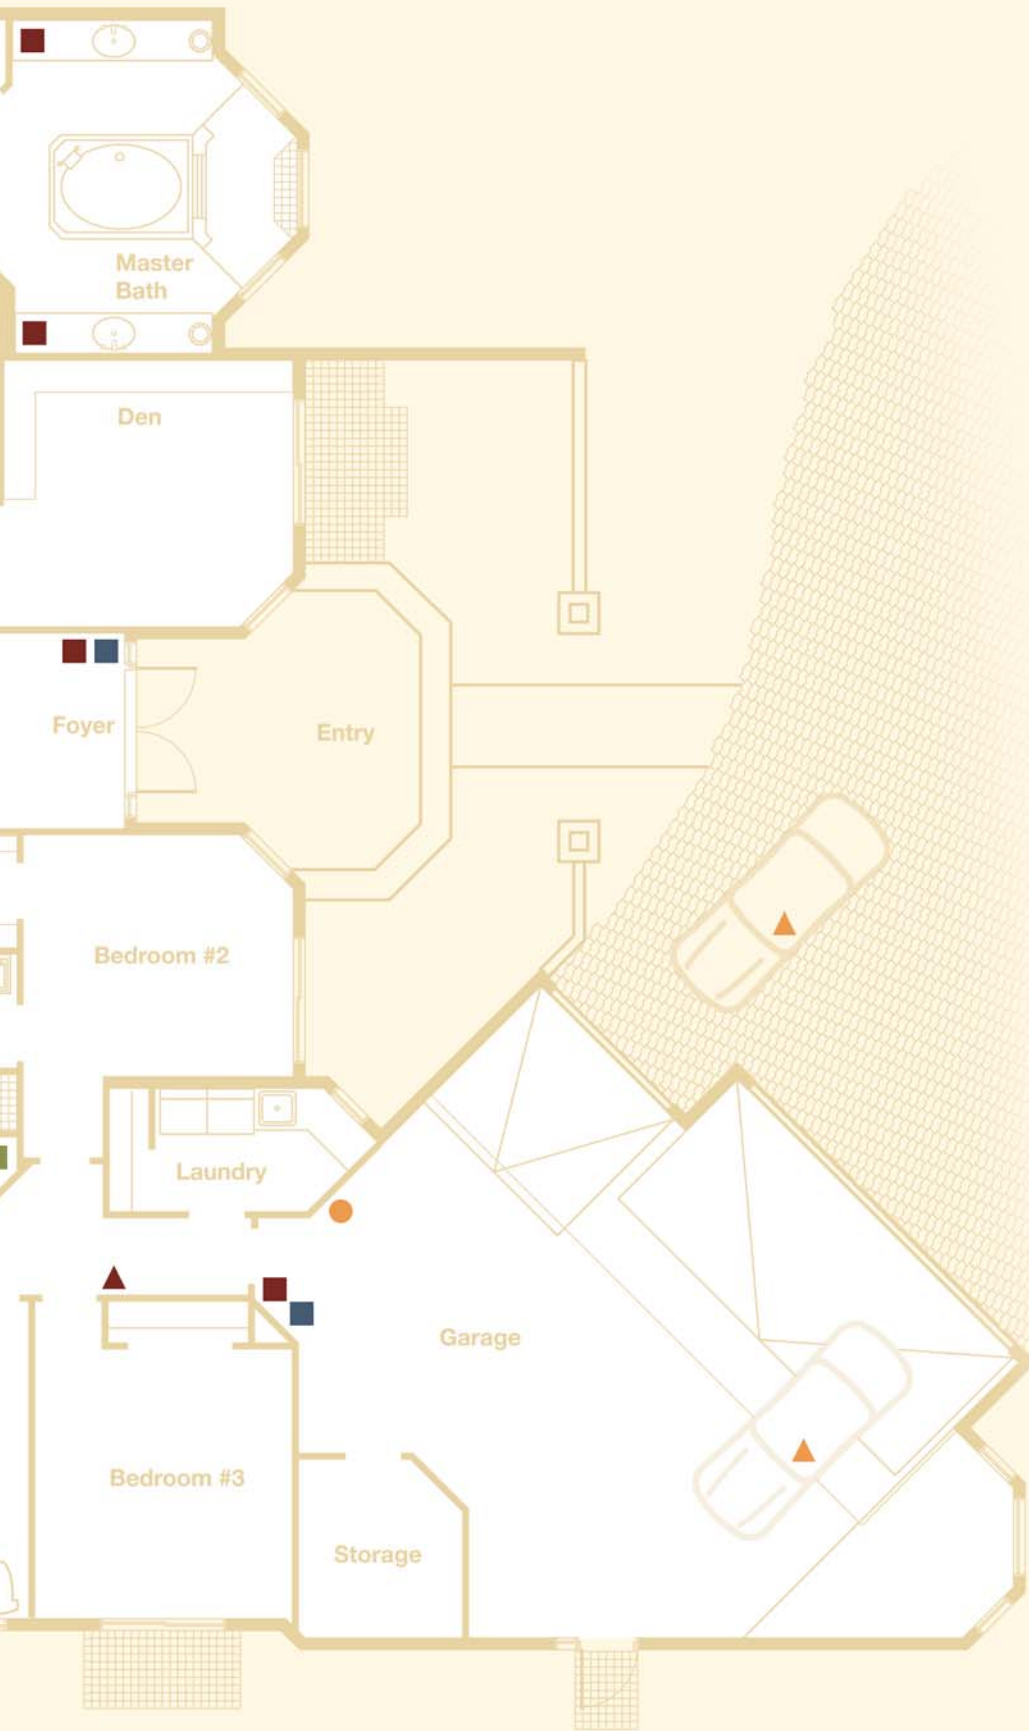

Example | 18 dimmer controls

A HomeWorks® system is made of separate components that work in unison providing total home lighting control that is customized for your home and your lifestyle. The types of components include master keypads, dimmers, car visor controls and system controls.

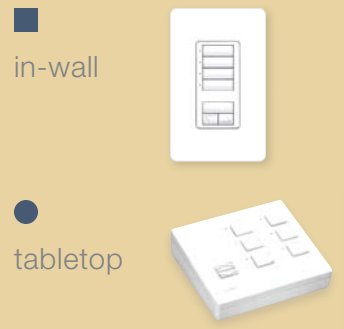

The HomeWorks wireless series products utilize patented HomeServe™ radio frequency technology. Wireless series products can be installed in any new or existing home without changes to walls or new wiring.

The wireless series is compatible with all other HomeWorks series, and can be used to expand existing systems at anytime.
